FOREST STAND DELINEATION CHECKLIST

Date Submitted:
SITE INFORMATION & PROJECT DETAILS
Address:
Site or Project Name:
Site of Project Name.
INDICATE X or N/A BELOW
(Refer to State Forest Conservation Manual and City Supplement to determine level of
FSD required and corresponding minimum elements for submission)
Forest Conservation Application
Site Vicinity Map (site location, major roads, political boundaries, north arrow, scale)
Site Vicinity Map (site location, major roads, political boundaries, north arrow, scale) Standard Plan Elements (north arrow, scale, title, date, revisions, legend, etc.)
Standard Fran Elements (north arrow, scale, title, date, revisions, legend, etc.) Certification or stamp of qualified forest conservation professional
Property boundaries and adjacent land uses
Existing topography
Soil classifications
Steep slopes 25% or greater
Intermittent or perennial streams
Non-tidal wetlands and buffers
Floodplain and/or Floodway boundaries
Critical Habitat Areas
Critical Area boundary
Proposed limits of disturbance
Areas proposed for long-term protection
Extent of existing forest and/or tree canopy in and within 50' of site
Field verified forest boundaries using the maximum aerial extent of the canopy; indica
dominant species type for on-site forests and total area in acres of adjacent contiguous
forest areas
·
Existing street trees within 50' of site boundary Locations and CRZ for specimen trees 20" DBH or larger on site and within 50' of site boundary

State champion trees, City champion trees, and/or trees 75% of the size of the diamete
of the State champion tree of that species
Tree table listing size and condition of any specimen tree, street tree, or champion tree
potentially impacted by development
Location of trees or stands which have trees that are rare, threatened, and endangered
species (MD Natural Heritage Program)
Size and location of forest stands
Intermediate FSD Narrative (Separate document or as notes on the FSD map)
 Preliminary worksheet calculations showing forest conservation thresholds and
required retention amounts
Summary of walk-through forest survey
 Past and present management of forested areas and unforested areas
 Potential of stands adjacent to disturbance to recover or management
recommendations
Priority afforestation areas
Priority retention areas
Field sampling locations
Full FSD Forest Stand Analysis Narrative (Separate document)
Site description
Methodology
 Summary for each stand describing stand composition, structure, condition,

- Summary for each stand describing stand composition, structure, condition, function, and retention priority
- Recommendations for specific areas such as specimen trees
- Field sampling data sheets for each sample plot
- Forest stand summary sheets for each forest stand
