All COVID-19 safety protocols
will be followed]

NATURE NURTURES 2021

Workshop Summary:

Trauma is one of the major epidemics of the 21st century that is infiltrating communities throughout the nation. Trauma-Informed Care (TIC) is an approach that presumes that an individual is more likely than not to have a history of trauma.

This training provides introductory skills and a non-prescriptive approach on how to effectively implement a Trauma-Informed Care Approach by recognizing the direct impact that trauma has on an individual.

TIC 101 focuses on educating individuals on methods of integrating trauma informed knowledge into all aspects of relationships; and instructing agencies on ways to incorporate trauma services to recognize the signs and symptoms of trauma, thus avoiding possible re-traumatization.

TIC 201 provides an overview and dives deeper into special topics and methods specific to outdoor & nature program providers.
