NATURE NURTURES 2021

Workshop Summary:

This Nature Nurtures 2021 workshop will address the challenges of teaching in the outdoors and identify methods for success as you find ways to anchor outdoor experiences in curriculum requirements, provide your students with tools to find focus, and gain confidence in using an outdoor classroom. An overview of digital resources for K-12 teachers will be provided, and participants will be encouraged to step outside themselves to try a few bite-sized investigations during this virtually-led experience.
